This is helpful. Thanks. Right now, we are still trying to get squared away on the reporting requirements on this chemical and where this lies within the agency, and with other Agencies. Once we know more, we can advise on how to proceed with our website.

Alisha, here's a little more info as you consider how to proceed: the chemical involved has been the #1 search term people have looked for on our website since the incident. Here's a screen shot of the report:

Internal Search Terms

These are the terms people searched for from EPA Web pages (i.e., they used an EPA page's search box to continue). The table are cumulative percentages, averages over the last week and last 30 days.

All sections: [Summary](#) | [HTML Pages](#) | [PDF Documents](#) | [Non-EPA Referrers](#) | [External Search Terms](#) | [Internal Search Terms](#)

| 01/12/2014 | Unique Searches | 01/11/2014 | Unique Searches | 01/10/2014 |
|------------------------------|-----------------|------------------------------|-----------------|------------------------------|
| 4-methylcyclohexane methanol | 22 | 4-methylcyclohexane methanol | 28 | 4-methylcyclohexane methanol |
| radon | 22 | mold | 13 | 4-methylcyclohexane methanol |
| lead | 15 | lead | 11 | 348 |
| acid rain | 11 | Mold | 10 | acid rain |
| fracking | 11 | radiation | 10 | asbestos |
| global warming | 11 | radon | 10 | climate change |

Alisha:

Because the state is the lead do you prefer that we not have a webpage?

Cathy

Just learned we are directing folks to the FEMA website:
